

## Database Relational Schema

Information on a fictitious veterinary practice database, its tables, and relationships including Primary Keys, Foreign Keys and Constraints. **ERD.png & chenERD.png** files have been included in submission for better clarity, if required.

### Tables:

- **Animal:** details on animals that have been treated in the practice.
- **Appointment:** details of appointments for staff members and relevant information.
- **Billing:** invoices for appointments based on treatments performed.
- **Food:** details on food available that may be used for treatment.
- **Medication:** details of medications available that may be used for treatment.
- **Payments:** payments made against invoices in billing.
- **PetOwner:** details on the animal owners including contact information.
- **Staff:** details of staff members and their position within the practice.
- **Treatment:** details on treatment delivered and any relevant information.
